

Assignment 1 – If-Else Statement

Problem Statement:

You work in XYZ Corporation as a Data Analyst. Your company has told you to work with the if-else condition.

Tasks To Be Performed:

1. Input the values of a and b as 10 and 20 respectively. Now check if a is greater or b is greater using if condition. Think about all the edge cases, and print the statements accordingly.

```
In [7]: a, b = 10, 20
```

```
In [8]: if a>b:
        print('a is greater')
        elif a<b:
        print('b is greater')
        else:
        print('both are equal')
```

b is greater
